Investment Overview

Pine Island Plaza is a value-add acquisition of an 11,041 SF multi-tenant retail strip center in Broward County with significant embedded rent upside, a comprehensive capital improvement program, and a transformative 385-unit mixed-use development breaking ground directly behind the property.

Value-Add Through Stabilization

A \$250K capital improvement program (new roof, parking lot, facade, landscaping) will transform curb appeal and justify market-rate rents.

Significant Rent Upside

Several tenants paying well below \$25/SF market rate, including one at \$6/SF. Marking to market on rollovers and converting to NNN drives meaningful NOI growth.

385-Unit Development Catalyst

Plantation City Center (Related Group / BH Group) approved directly behind the property, adding 385 households to the trade area.

Seller Financing, 4.5%, 30-Yr Am

\$2.2M seller carry at 4.5% with 30-year amortization and 10-year balloon covers 65% of the purchase price. Builds ~\$296K equity over the hold period with a 1.67x DSCR from Day 1.

Capital Improvement Program

A \$250,000 CapEx program funded from the equity raise will address deferred maintenance, improve curb appeal and Pine Island Road visibility, and position the property for market-rate rents.

New Roof

Full replacement eliminating deferred maintenance, reducing insurance costs, 20+ year protection.

Parking Lot Resurfacing

Complete resurfacing and restriping for first impressions, tenant satisfaction, and ADA compliance.

Landscaping & Tree Trimming

Major overhaul and tree trimming to improve visibility from Pine Island Road, the primary traffic artery.

Paint & Stucco Facade

Fresh paint and stucco across the entire facade to modernize appearance and attract higher-caliber tenants.

Total CapEx Budget

\$250,000

Impact on Pine Island Plaza

- ◆ **Density injection:** 385 new households within walking distance creates immediate demand for local services (medical, salon, insurance, dining) matching our tenant mix.
- ◆ **Rent compression:** Increased foot traffic and population density will push market rents higher in the corridor, accelerating our mark-to-market strategy.
- ◆ **Vacancy absorption:** New residents need services. Two vacant units become easier to fill at higher rents as the development takes shape.
- ◆ **Cap rate compression on exit:** Institutional-quality mixed-use development raises the trade area profile, attracting sophisticated buyers at lower cap rates.
